Roberto Remedios Araya

I am a UX / UI Designer and Front-End Developer. My work's main goal is to understand and design the best experience for the user. To accomplish this i deep dive on the client's goals and research on the user industry behavior. I also create a semantic, scalable and reusable code to ensure future changes or improvements.The majority of my projects have involved collaboration between teams and multiple groups using agile methodologies. Some of my specialties include HTML(5), CSS(3), javaScript, Responsive or Mobile first design/code, cross-browser fixes, create CMS themes for WordPress, and Adobe tools as Photoshop, Illustrator.
